

MEMORANDUM

Date : June 14, 1995

To : Kernville Chamber of Commerce

From : Robert Kinosian, Regulatory Analyst, Division of Ratepayer Advocates

File No.:

Subject : Kern River Hydro Project

This letter is to confirm the information I provided to Rick Dancing in a phone conversation last week. As I stated to Mr. Dancing, the Kern River Hydro project is a minute portion of Southern California Edison's electric system. It provides less than 2/10's of 1% of Edison's electric resources (36 MW out of a system of over 21,000 MW). Given that this resource comprises such a small percentage of Edison's resource mix, elimination of the Kern River Hydro plant would have essentially no impact on Edison's overall costs or rates to its customers.
