Subject: RE: SGMA Implementation Grant R1
Importance: Normal
Sensitivity: None

I had a call with Paul Gosseling this afternoon.

As discussed last week, the GSA's should proceed with the submission noting that SWK is the holdup. We will be placed into incomplete status at the first possible minute.

However, there is the bad actor provision below. It is unclear how it will be applied, but it is in the regs. The bad actor is SWK if the GSP is otherwise deemed complete. We should work from the assumption that our collective efforts are sufficient, despite SWK's last minute antics. If other deficiencies are found, they would need to be addressed anyway.

On the grant front, Paul indicated that we should finish the funding letter. The funding is not based on incomplete status, and the GSA's should carry on with the projects and management actions needed to keep moving forward – including the projects. The incomplete status should not be seen as a dead end, but rather a speed bump in the process.

Jeof

Attached would be the SGMA provision that stops hostage taking such as we are seeing.
